

# [Baby Crib Mattress with Personal Label Attached having Adult Mattress Comfort, Quality ,Style and Appeal]

## Abstract

A adult style and appearance bed assembly providing a reduced sleeping surface trimmed to dimensions specified in figure 1 and 2 to allow for a sleeping surface suitable for a toddler size mattress that will fit into a suitable size toddler crib structure or equivalent style crib structure. This can be accomplished by providing raw materials found in certain high quality adult mattresses materials and constructing them using already proven and tested industry techniques to make a higher quality baby mattress, uniquely crafted with an appearance that separates its look, feel and comfort and quality from all other current model baby mattress designs. Customer chosen label is added to the top surface with chosen inscription to add sentimental value and personal description to the mattress. The final trim dimensions of the mattress will be about  $51 \frac{5}{8} \times 27 \frac{1}{4} \times 9$ ". Also while the mattress according to the invention can have a thickness of about 9" like conventional mattress, the inner spring mattress has a riser height

typically from about 6"to 9" allowing our design flexibility to be able to adapt to non-standard crib design height configurations. The resulting look is fuller, more attractive and provides better comfort and restful sleep for the occupant.
